

DIXON HUGHES PLLC

Certified Public Accountants and Advisors

Construction News InContext | April 2008

BE ALL THAT YOU CAN BE

The Dixon Hughes Construction Executive Conference has always strived to enable contractors by providing vital information they need to reach for the stars. This year we will not only reach for the stars, but we will deliver insightful information to help get you on your way. You will be challenged by the **Co-Founder of the Lean Construction Institute** to recreate your project implementation. Finally, you will be inspired to be the best you can be by one of only 12 people to **walk on the moon**.

The opening keynote address will be delivered by Dr. Glenn Ballard, the **Co-Founder of the Lean Construction Institute**. Dr. Ballard brings 25 years of construction industry experience in the area of project performance improvement. You will be introduced to lean theory, principles and techniques to create a new form of project management to design and build capital facilities.

The conference main-course as always will be our own “**industry thought leaders**” from Dixon Hughes, CIS Consulting Group and Nexen Pruitt; these professionals stay informed of best practices in technology, law, and comprehensive accounting, tax and advisory services to address bottom-line results.

Our closing keynote speaker is **Captain Alan Bean**, the Lunar Module Pilot for Apollo 12, who personally walked on the moon. Alan will take each person with him on the Apollo 12 flight and present some thoughts and ideas to help each of us reach for our own professional and personal stars.

Alan Bean, former NASA Astronaut

We couldn't be more excited about the 2008 Dixon Hughes Construction Executive Conference. Remember we are conducting **one** big event this year, so **DO NOT MISS IT**, register now to confirm your spot.
